

PROGRAMMING FOR INTERACTION FINAL

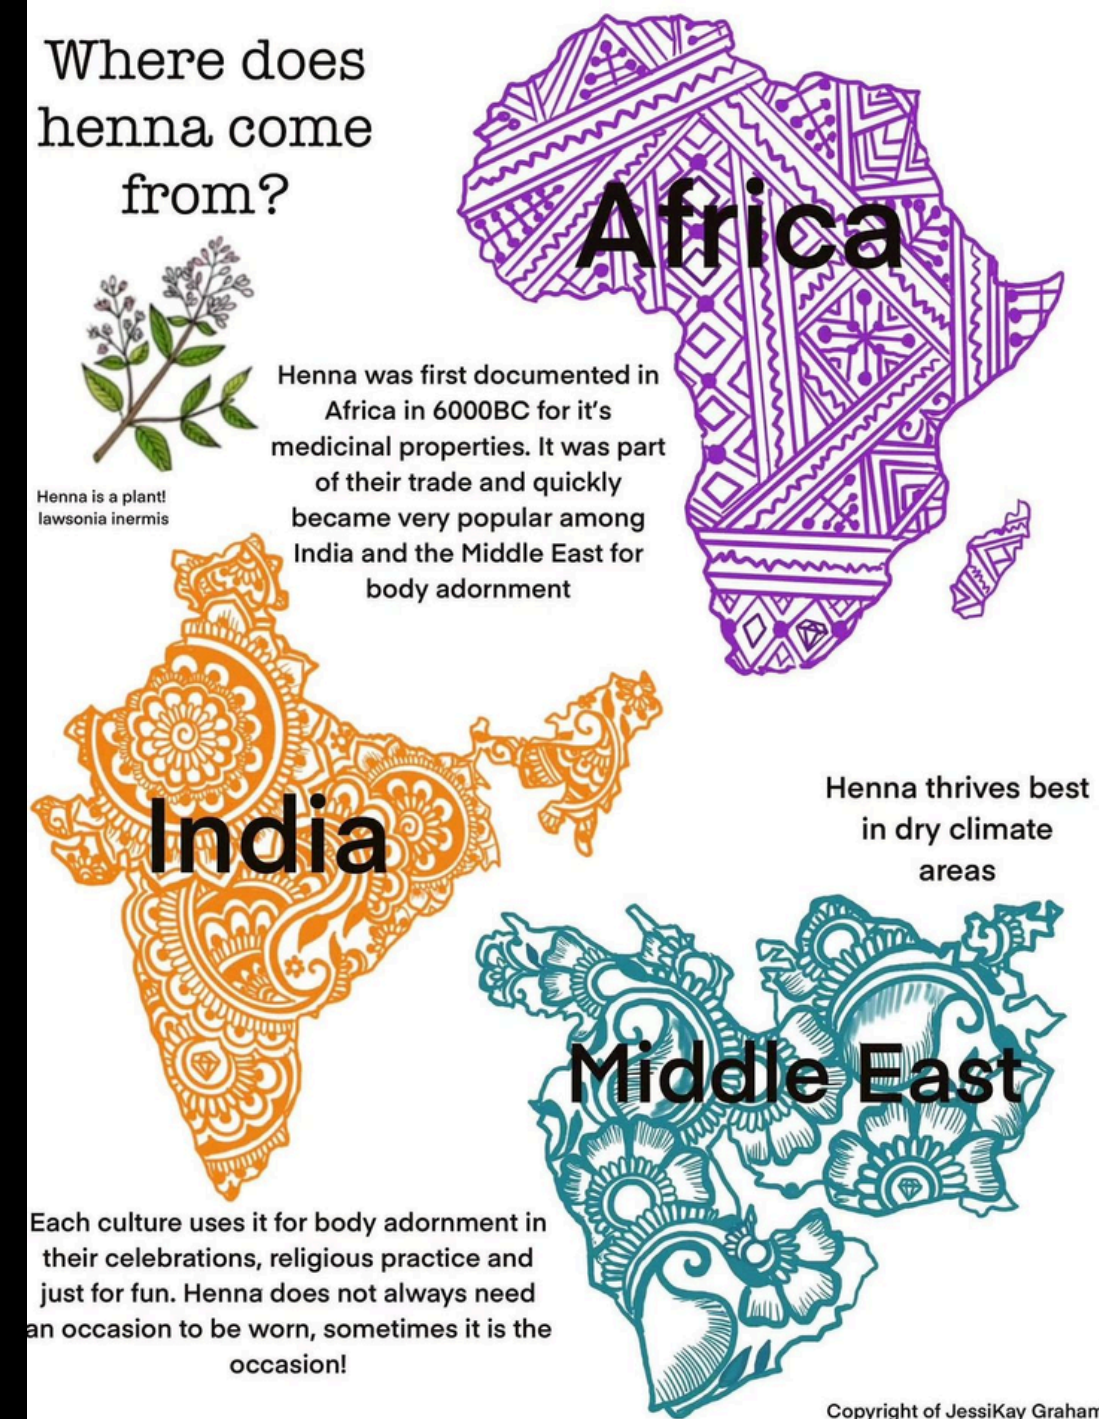

INSCRIBED

NADYA MOHAMAD F

AIM & RATIONALE

Exploration of how interactive digital systems can **preserve, reinterpret, and reanimate** cultural rituals.

Henna is traditionally practiced within women's spaces (i.e., domestic settings, pre-wedding gatherings, intergenerational circles) where knowledge, stories, and feminine identity are passed on. I wanted to **translate those intimate rituals into a digital environment, reframing the interface as a space for cultural preservation.**

RESEARCH

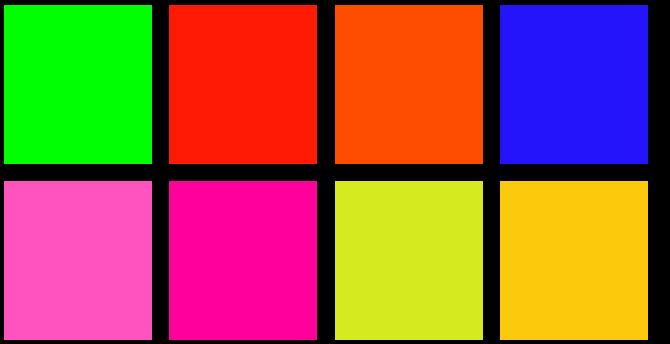

HENNA ARTIST:
[@RUQAIYYAHBOO](#)

ANCESTRAL PRACTICE TO CONTEMPORARY EXPRESSION

WOMAN APPLYING HENNA
LATE 16TH CENTURY
[@ THE MET](#)

MOODBOARD

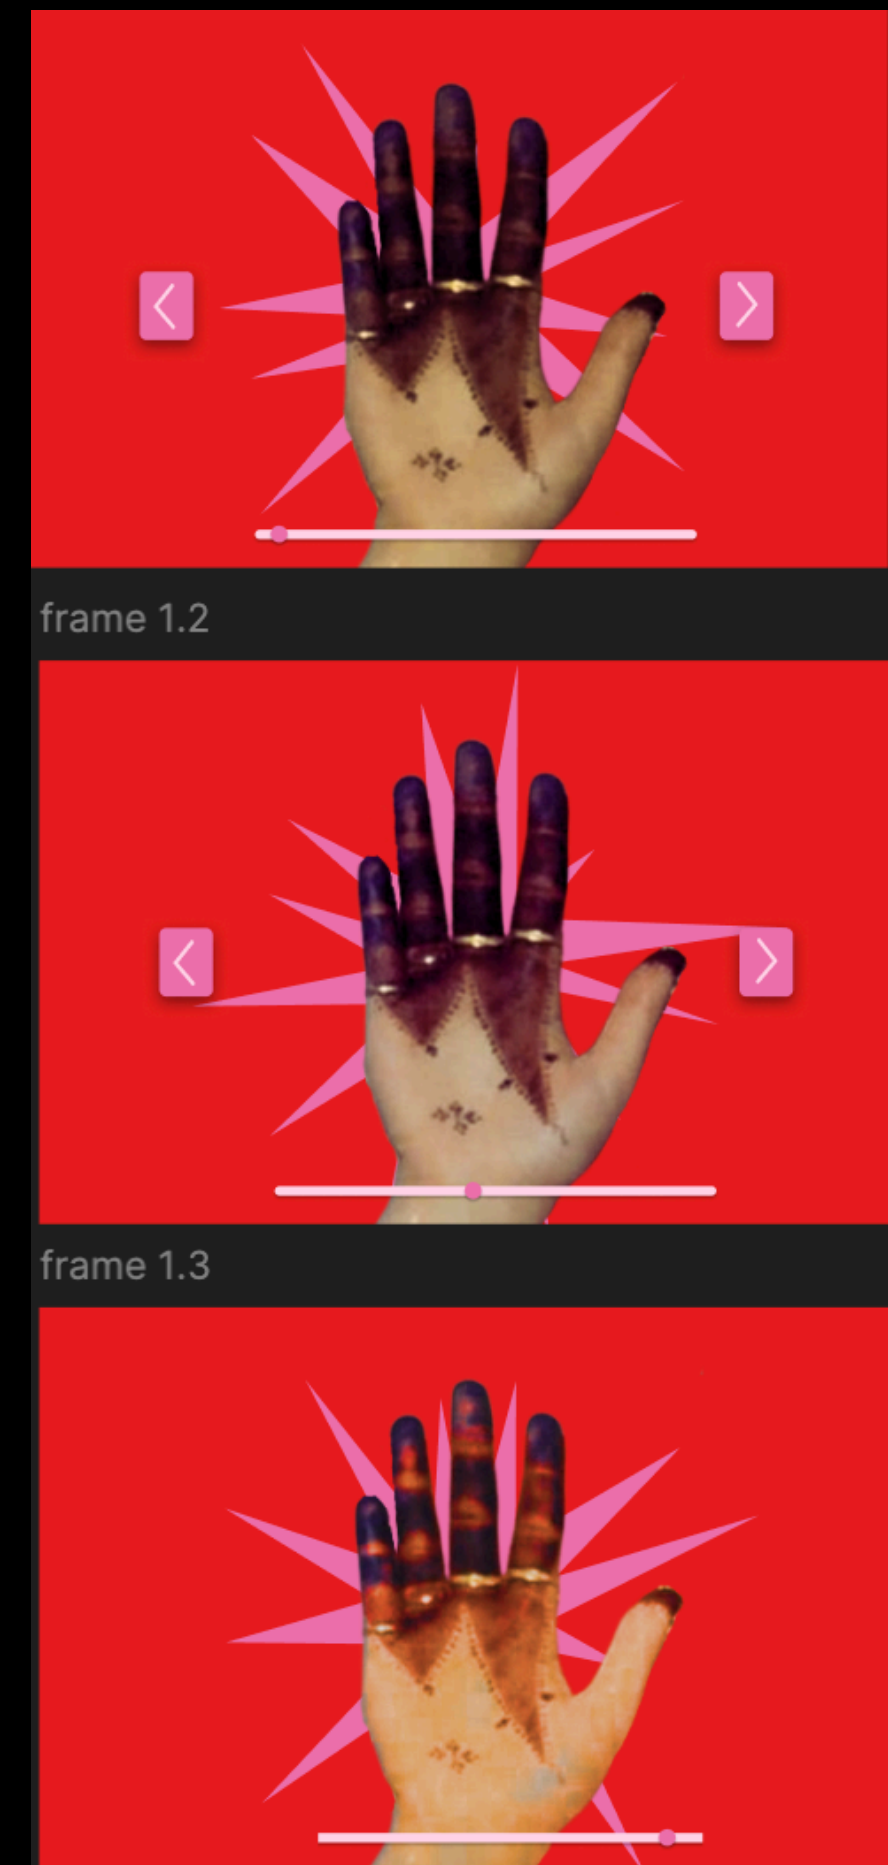

NEON PALETTE AND GRAPHIC DIGITAL LANGUAGE

→ **RITUAL EXISTING IN A
CONTEMPORARY SENSORY
LANDSCAPE**

MECHANICS

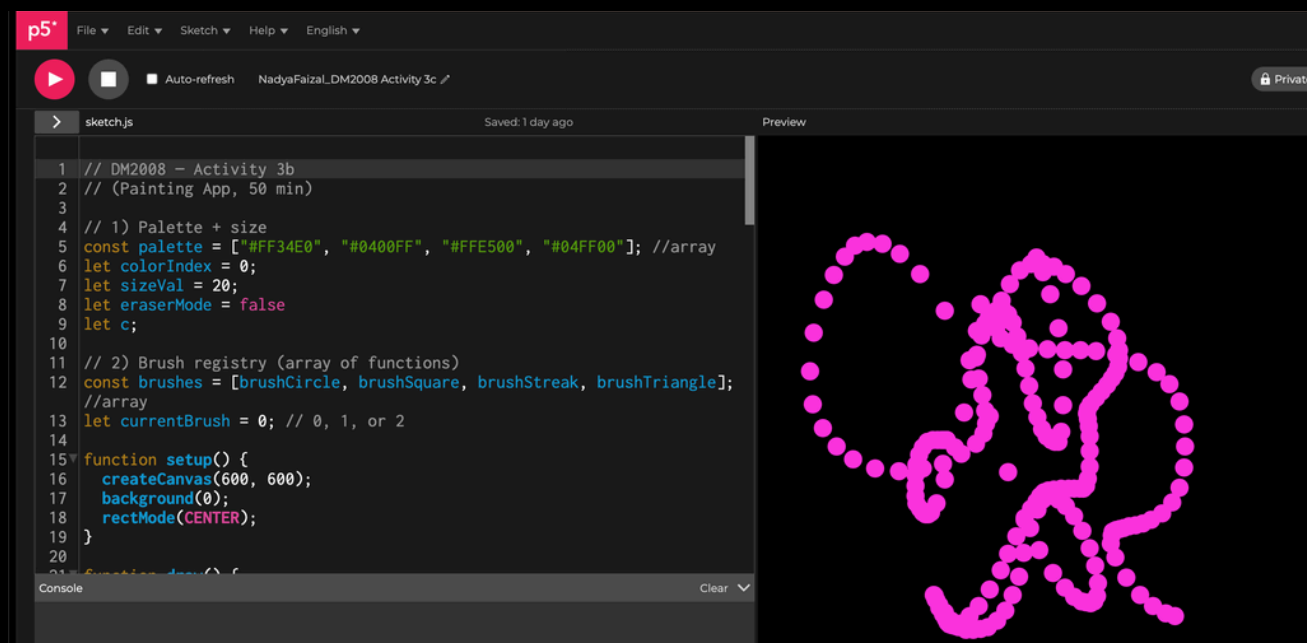

- **Button:** Change styles between regional/contemporary styles, reflecting its diversity.
 - **Slider:** visualisation of the henna life-cycle
→ representing body as archive, mirrors temporal unfolding of henna stain from dark to light then back
- interactive shapes in **background**

initial prototype on figma

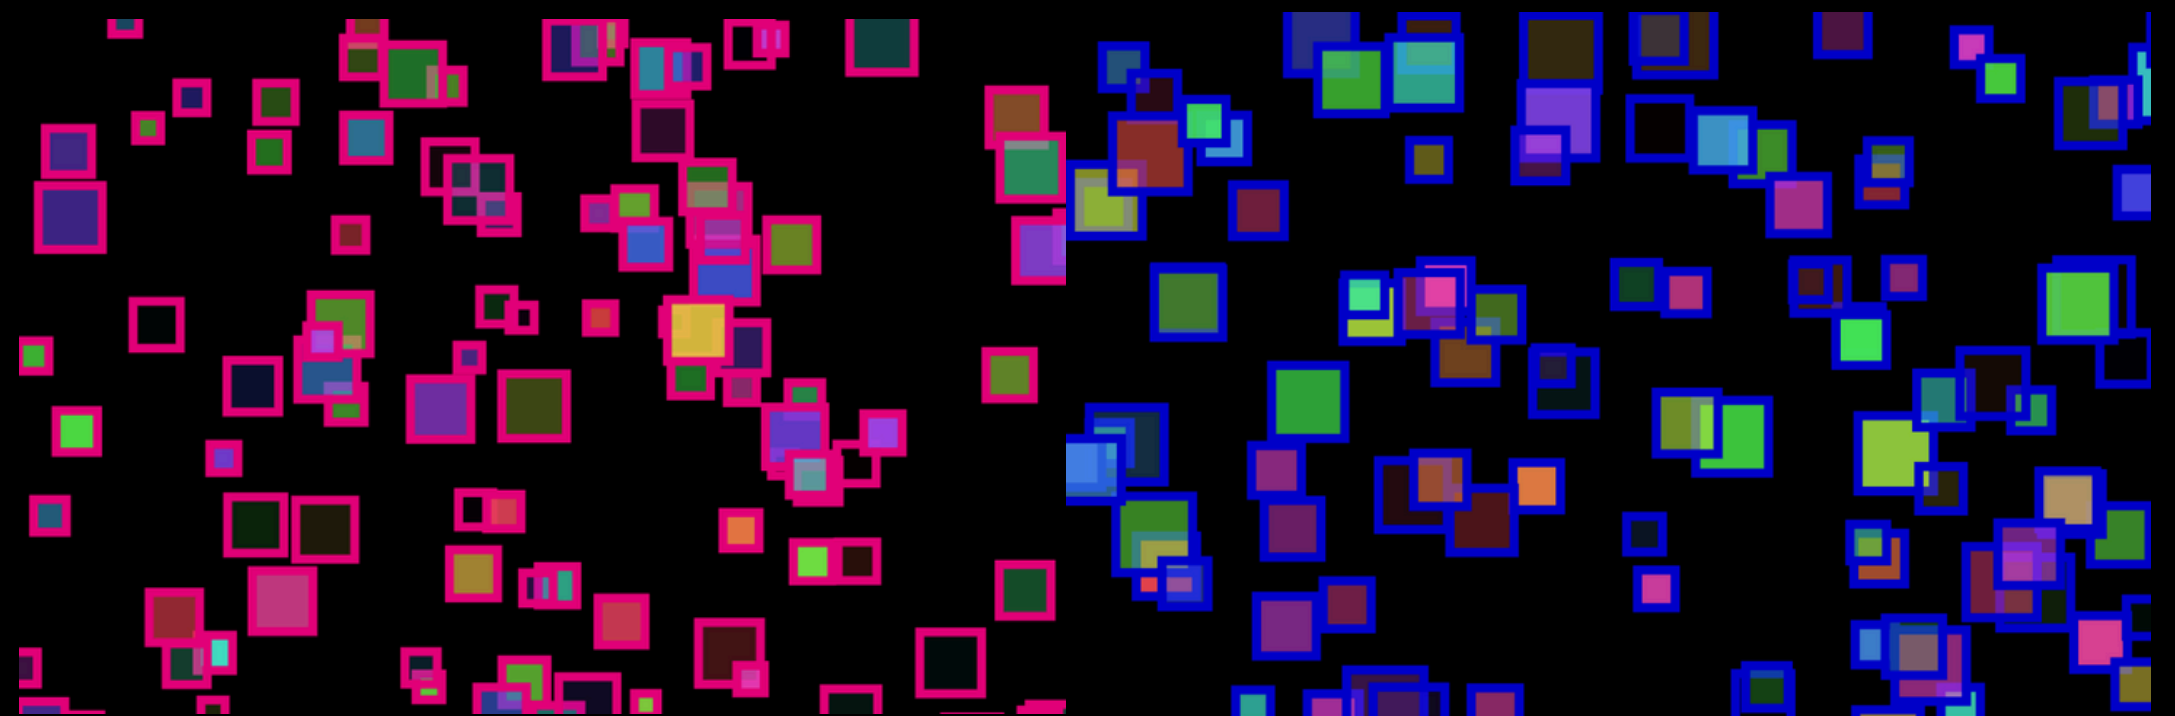

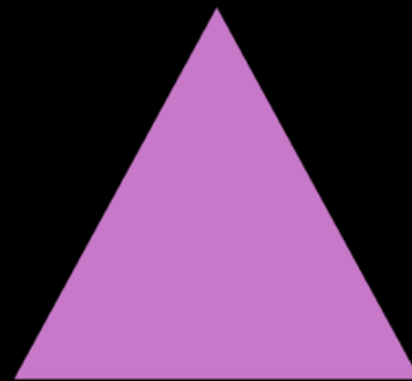

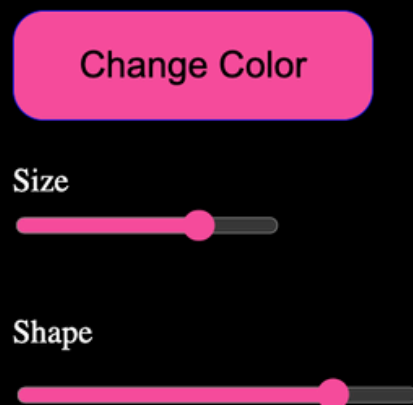

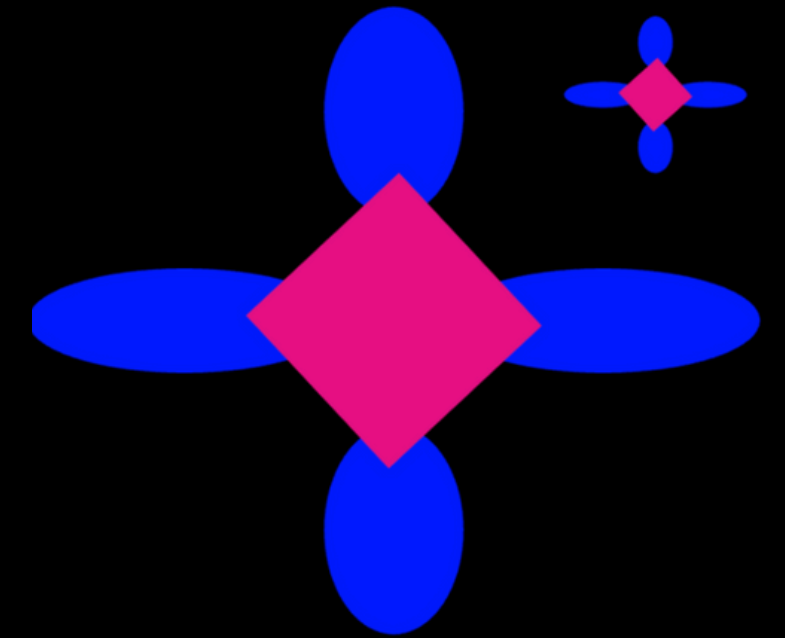

PROCESS DOCUMENTATION

referencing previous activities for my code....

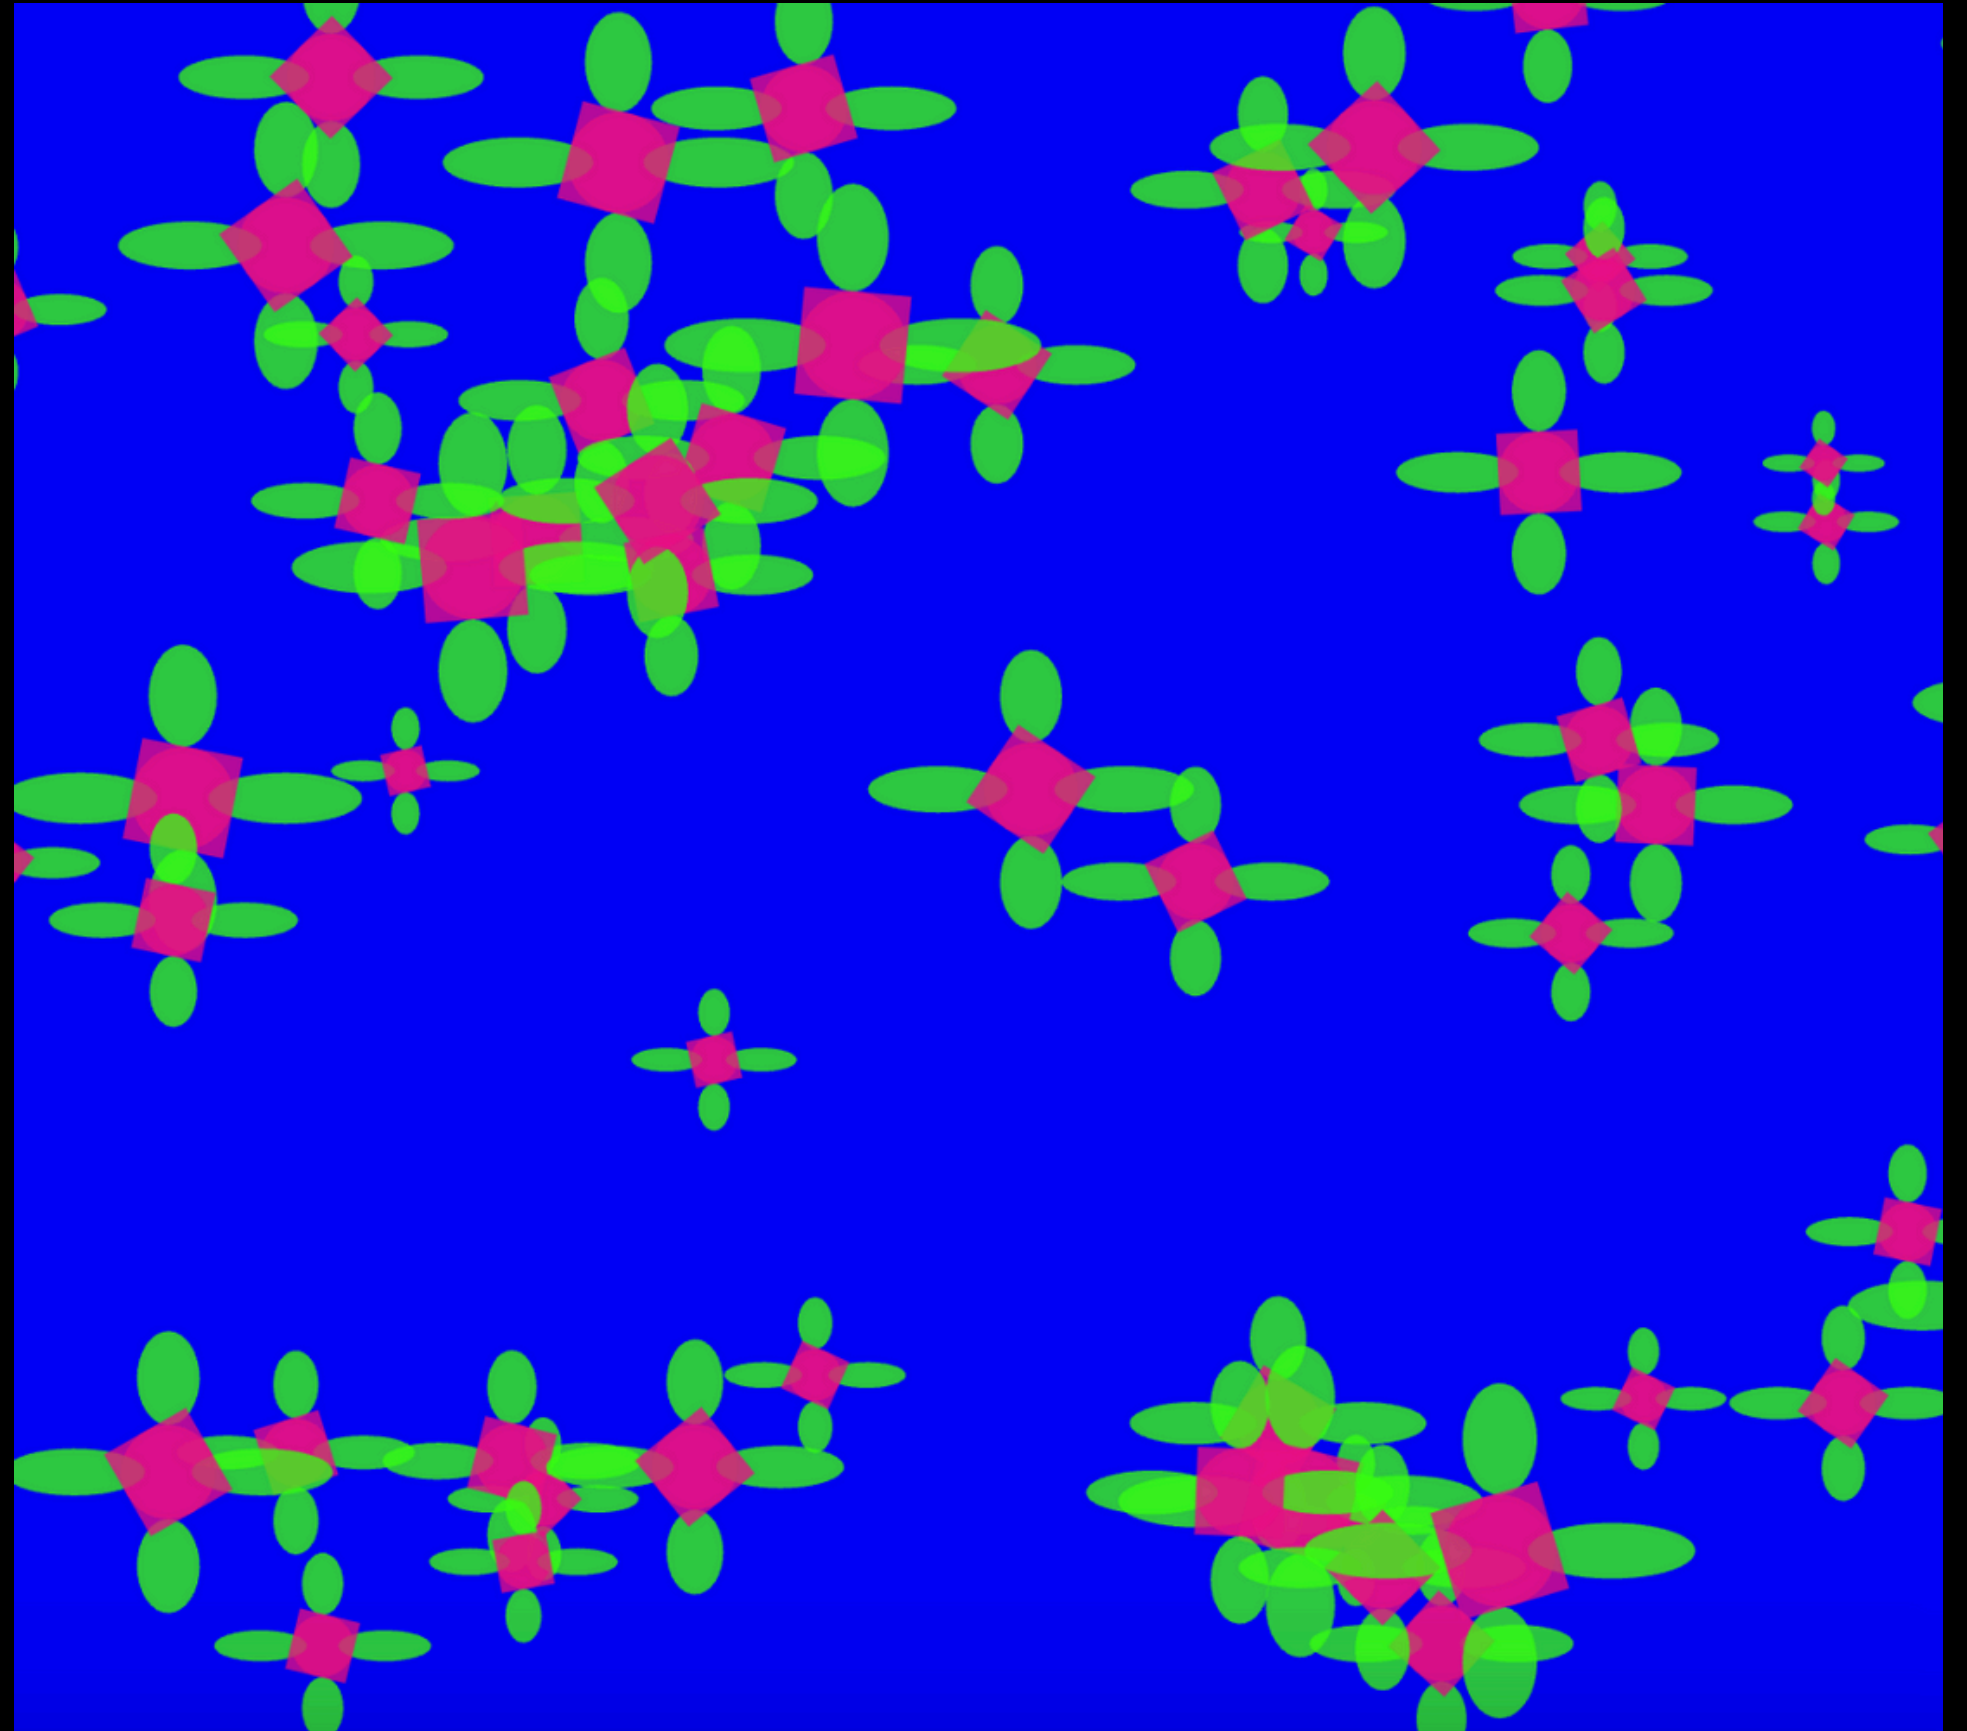

- activity 3b: painting app
- activity 10: interface design
- activity 4b: objects in motion

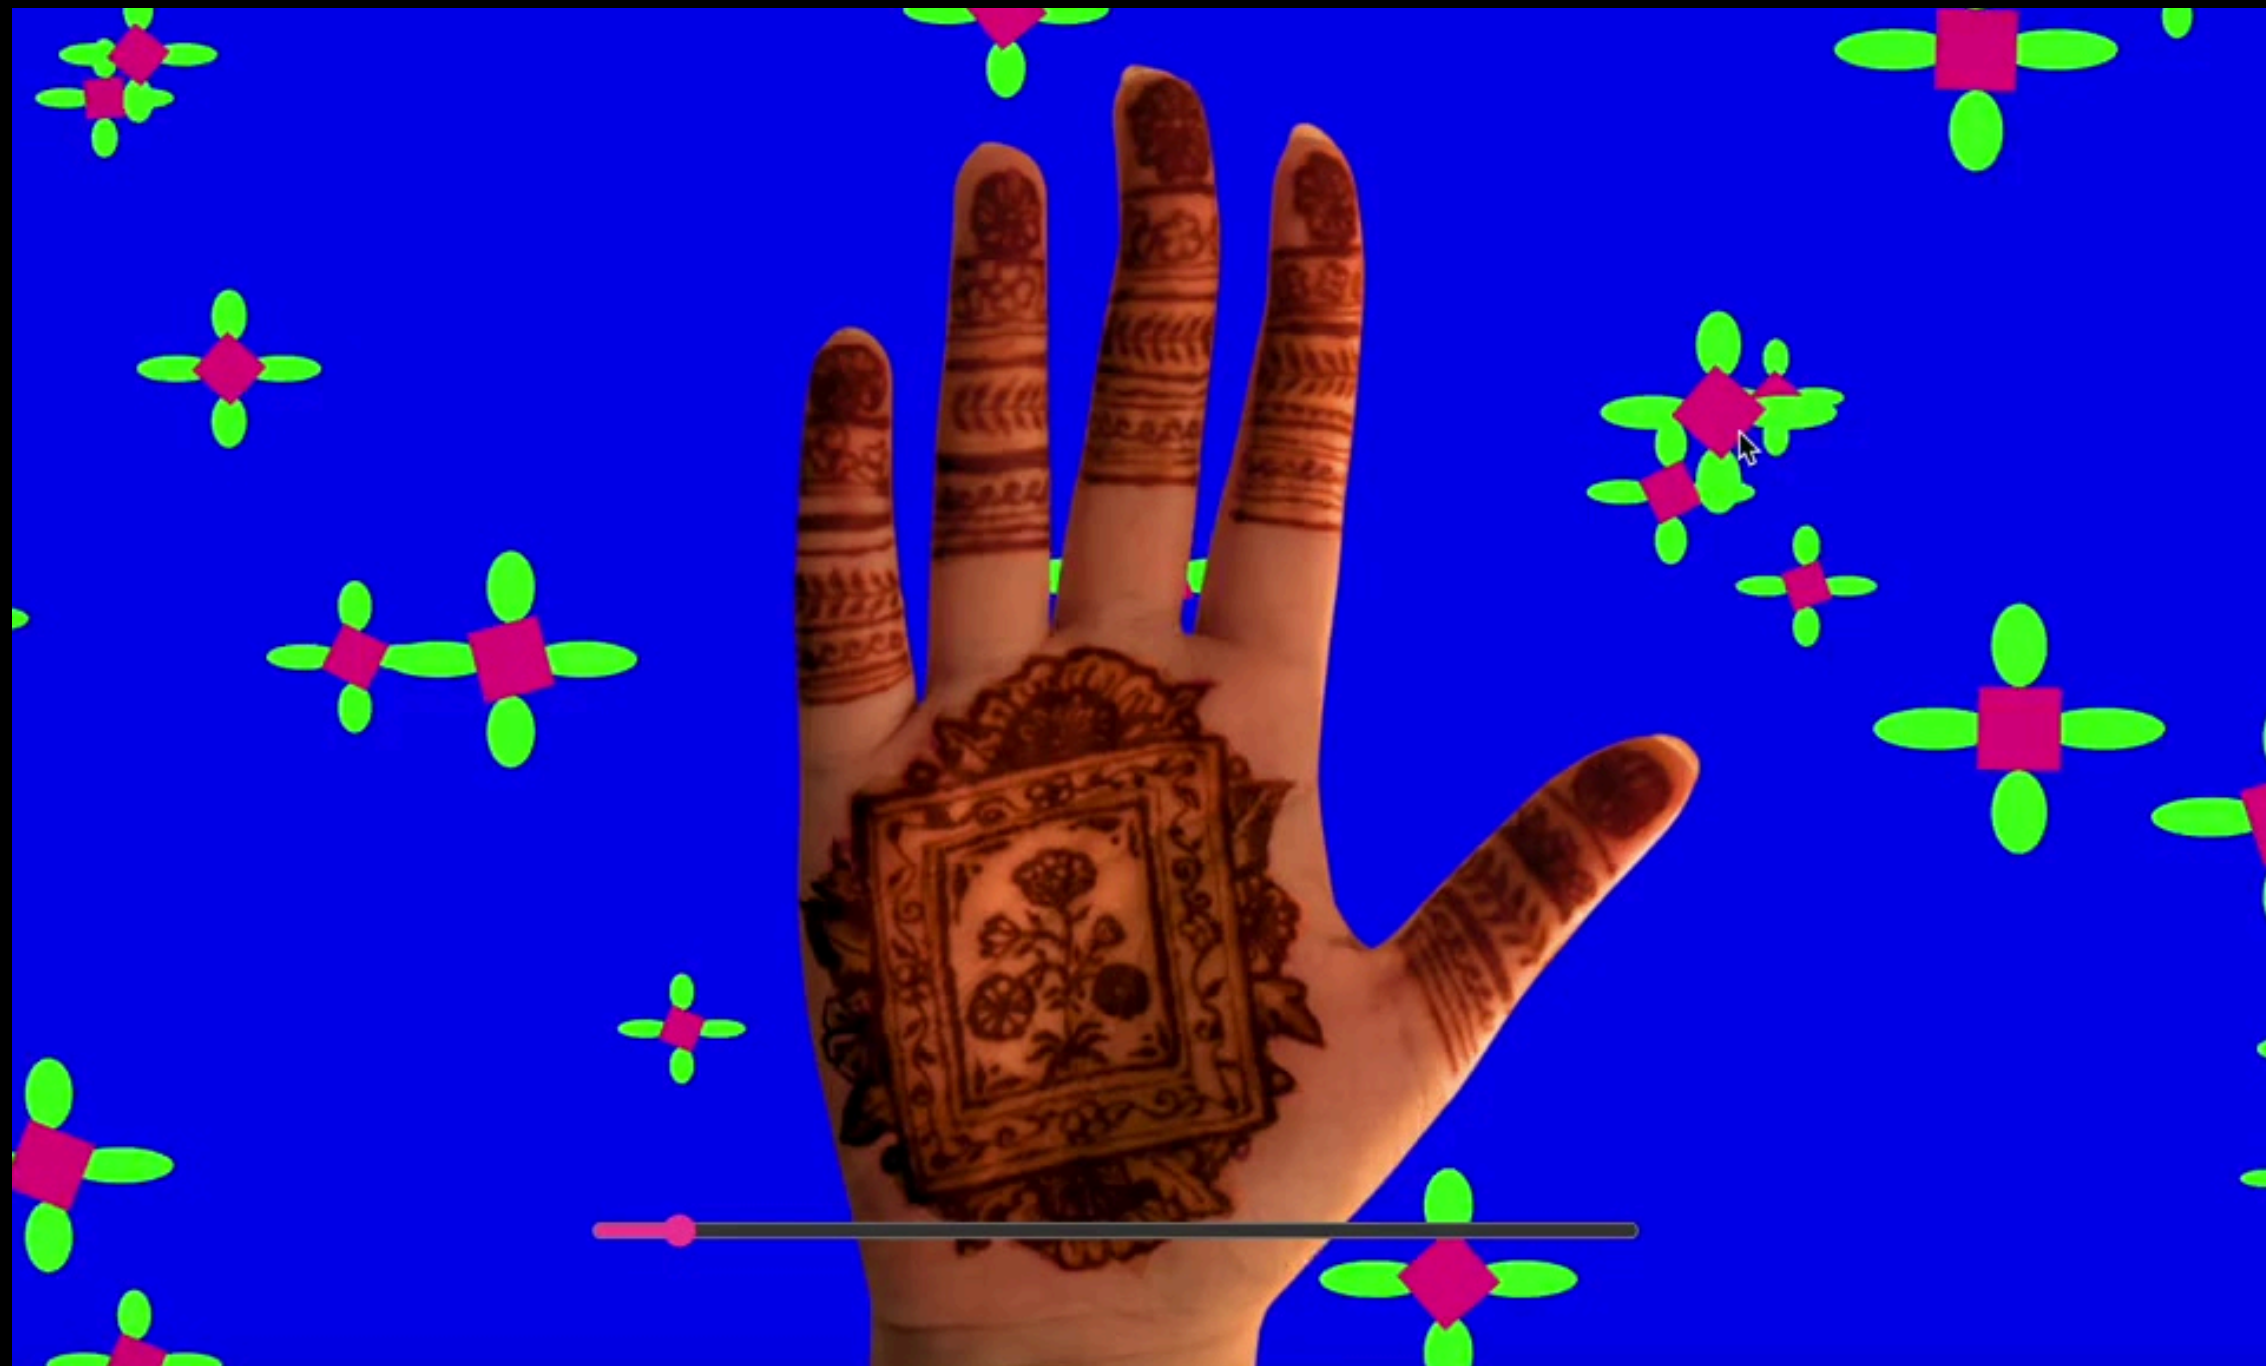

PROCESS DOCUMENTATION

STYLISTED VERSION OF A “FLOWER”

→ RITUAL EXISTING IN A
CONTEMPORARY SENSORY
LANDSCAPE

PROCESS DOCUMENTATION

AFTER I GOT THIS POINT

→ **REALISED IT WAS LOWKEY
BORING TO JUST DISPLAY THE
INTENSITY OF THE HENNA STAIN**

PROCESS DOCUMENTATION

STARTED THINKING ABOUT THE EXPERIENCE OF GOING TO A HENNA BOOTH

I WANTED TO RECREATE THIS EXPERIENCE DIGITALLY

**CUSTOMER
GIVEN A
CATALOGUE**

**CHOOSES A
DESIGN THEY
LIKE**

**HENNA ARTIST
RECREATES
THAT DESIGN**

REFLECTION

All in all, I am satisfied with the interaction I achieved and I think I was able to achieve my project aim. However, I wish I could have expanded the project further, particularly by allowing the user's drawing to be added into the catalogue on the first page.

This feature would have supported one of my larger conceptual aims: treating the interface as a living archive of community contributions, mirroring how cultural motifs evolve through collective participation. Being able to return to their own design, or view others' added designs, would have deepened the sense of continuity and shared history that the ritual of henna naturally embodies.

THANK YOU
